

WE HAVE ANSWERS

- Our Financial Dashboard brings clarity to your panel attribution changes, the strength of your network and allows your team to focus on the solutions rather than the problems.
- Our PCP level reporting helps your providers to identify where their total cost of care is spent, where the services are more expensive for their patients and help patients avoid unnecessary ED and IP costs.
- We tailor incentive reporting and a PCP incentive payout structure to directly address your most impactful incentive programs. Monthly tracking of these elements will help you keep each provider focused on the target without overwhelming them in reports from each health plan.
- We can risk stratify your entire population and provide patient lists by PCP. Our disease state flags allow us to easily label each population and display individual patient risk scores relative to the panel.

OUR SERVICES

- We offer a full report suite with actionable information delivered monthly for less than the cost of an analyst.
- Our reports can be selected as à la carte options. Pick only the items your organization needs.
- Annual strategic insight reports are created for each of our clients. These reports focus on the “hot spots” to be addressed in the coming year and celebrate the success of the current year.

YOU HAVE QUESTIONS

- How do we transform Milliman data into actionable reporting?
- How do we distribute actionable disease management reports to providers?
- How do we improve our Incentive Program Management?
- How do we help our providers lower total cost of care?
